
David Doyle, CISSP, CISM, PCI-ISA

Summary

David Doyle is a highly experienced cybersecurity, privacy, and risk management leader with more than three decades of experience across technology, healthcare, aviation, energy, critical infrastructure, privacy, regulatory compliance, and global enterprise operations. His background combines executive leadership, hands-on assessment expertise, governance experience, and a proven ability to strengthen cybersecurity and privacy programs within complex multinational environments.

David is especially well suited to cybersecurity consulting, digital governance reviews, enterprise cyber risk assessments, privacy program evaluations, regulatory compliance assessments, third-party risk management, operational resilience initiatives, and cybersecurity transformation engagements.

For international organizations such as the United Nations, David offers a unique combination of cybersecurity leadership, privacy expertise, global assessment experience, governance knowledge, and practical risk management. He helps organizations identify material risks, evaluate control effectiveness, strengthen resilience, and develop sustainable cybersecurity and privacy programs that align with mission objectives and operational realities.

Professional Cybersecurity Assessment Bio

David Doyle is a cybersecurity, privacy, and enterprise risk management executive with more than 30 years of experience assessing, designing, leading, and improving cybersecurity and privacy programs across global organizations. His career includes executive and senior leadership positions supporting major multinational organizations, where he has combined strategic leadership with practical cybersecurity, privacy, governance, and compliance expertise.

David has held leadership roles across technology, healthcare, aviation, energy, and critical infrastructure sectors, including positions with Apple, TikTok, Kaiser Permanente, Hawaiian Airlines, Constellation Energy, and other large-scale organizations. Throughout his career, he has led enterprise security programs, privacy initiatives, governance functions, compliance programs, and risk management activities supporting complex and highly regulated operating environments.

He brings a strong combination of cybersecurity assessment expertise, executive leadership, privacy governance experience, and practical risk management. His work has focused on helping organizations understand their cybersecurity posture, evaluate operational and regulatory risks, strengthen governance frameworks, and develop sustainable security strategies that support both organizational objectives and operational resilience.

Cybersecurity Assessment and Risk Leadership

Throughout his career, David has performed and overseen thousands of cybersecurity, privacy, physical security, and compliance assessments throughout the Americas (AMRs), Asia Pacific (APAC), and Europe, Middle East, India, and Africa (EMEIA).

His assessment experience aligns closely with the requirements of international organizations and includes cybersecurity maturity assessments, governance reviews, risk management evaluations, privacy assessments, third-party risk reviews, regulatory compliance assessments, and strategic security program evaluations.

David is experienced in assessing cybersecurity risk from both strategic and operational perspectives. He works effectively with executives, boards, operational leaders, legal teams, privacy professionals, technology teams, and business stakeholders to ensure assessment findings are actionable, practical, and aligned with organizational priorities.

Throughout his work, David has demonstrated the ability to translate complex cybersecurity and privacy challenges into practical recommendations that improve resilience while supporting business and mission objectives.

Privacy, Governance, and Regulatory Leadership

A significant portion of David's career has focused on privacy, governance, and regulatory compliance. He has developed and led privacy programs, supported privacy-by-design initiatives, advised on data protection requirements, and integrated privacy controls into broader enterprise risk management frameworks.

His experience includes helping organizations navigate complex regulatory environments while balancing operational requirements, business objectives, and risk management responsibilities. He has worked closely with executive leadership teams to establish governance structures that support accountability, compliance, and long-term program maturity.

This combination of cybersecurity and privacy expertise is particularly valuable for organizations seeking to strengthen digital governance while ensuring the protection of sensitive information and critical services.

Global Security Program Development and Transformation

David has extensive experience building, maturing, and transforming cybersecurity and privacy program for large multinational organizations.

His work has included the development of governance frameworks, risk management methodologies, compliance programs, security operations capabilities, third-party risk management processes, and executive reporting structures. He has led security transformation

initiatives that improved organizational visibility, accountability, operational effectiveness, and cybersecurity resilience.

His experience working across geographically dispersed organizations provides him with a strong understanding of the challenges associated with implementing cybersecurity programs across multiple jurisdictions, cultures, and regulatory environments.

For international organizations operating across diverse regions and stakeholder groups, this experience is especially relevant when evaluating cybersecurity maturity, governance effectiveness, and organizational resilience.

Industry Leadership and Advisory Experience

David is widely recognized as a cybersecurity and privacy thought leader. Throughout his career he has served on advisory councils and industry leadership groups supporting the advancement of cybersecurity, privacy, and security governance practices.

His contributions have included advisory roles with ISACA, ASIS International, Corporate Executive Board, Vormetric, GuardianEdge, and Clearwell. He also served as Chairman of the ASIS International Council and has been an active contributor to professional security and risk management communities.

In addition, David is a former adjunct faculty member for the Institute for Applied Network Security and currently mentors graduate and undergraduate cybersecurity students through Kennesaw State University's cybersecurity programs.

His experience as a mentor, advisor, and frequent conference speaker reflects his commitment to advancing cybersecurity knowledge, developing future leaders, and sharing practical lessons learned from decades of industry experience.

Executive Communication and Actionable Recommendations

One of David's key strengths is his ability to communicate complex cybersecurity, privacy, governance, and risk issues in a manner that is understandable and actionable for executive leadership.

He has extensive experience presenting assessment findings, risk evaluations, program recommendations, and strategic roadmaps to executives, boards of directors, regulators, operational leaders, and business stakeholders.

His communication style combines technical credibility with practical business judgement, enabling organizations to make informed decisions regarding risk, investment priorities, compliance obligations, and long-term resilience objectives.

This ability to bridge the gap between technical findings and executive decision-making is particularly valuable in assessment engagements where recommendations must be practical, defensible, and aligned with organizational mission requirements.

Professional Credentials

David's career reflects more than three decades of leadership across cybersecurity, privacy, governance, compliance, and enterprise risk management disciplines. He has held executive leadership positions including Chief Information Security Officer, Business Information Security Officer, Global Privacy Leader, and senior cybersecurity advisor supporting complex multinational organizations .

His professional experience includes leadership of global cybersecurity and privacy programs, enterprise risk management initiatives, compliance programs, security assessments, and organizational transformation efforts across technology, healthcare, aviation, energy, and critical infrastructure sectors.

This combination of executive leadership, global assessment experience, privacy expertise, and governance knowledge provides a strong foundation for supporting cybersecurity, digital governance, and organizational resilience initiatives for international organizations and public-sector entities.
